

Department of Electronics Engineering organizes Guest Lecture on “Semi Automatic Copper Foil Surface Roughness Detection from PCB Micro-section images” for IInd Sem M.Tech.(ETRX) and M.Tech.(VLSI)

Guest Lecture Conducted for IInd Sem M.Tech.(ETRX) and M.Tech.(VLSI) on the topic “Semi Automatic Copper Foil Surface Roughness Detection from PCB Micro-section images” by Soumya De, Signal Integrity Engineer at Cisco Systems **through Web-Video conferencing**. Soumya De who is currently working at Cisco System as Signal Integrity Engineer. He is also alumni of GHRCE(2006 Batch). The main research area of Soumya De is “Surface roughness characterization of High Speed Cisco boards”. During his talk, he primarily talks on his patented work “Method and apparatus for determining surface roughness of metal foil within printed circuits”.

Soumya De

Career counseling seminar organized by Electronics & Telecommunication Department under Alumni Cell.

**MR. HAREN DODKE GUIDING UNDER GRADUATE STUDENTS ON
CAREER SELECTION**

On January 19, 2015 Department of Electronics & Telecommunication Engineering organized career counseling seminar. It was enthusiastically attended by over 45 under graduate students of VI semester section C and faculty members. Speakers included alumni of Department of Electronics & Telecommunication Engineering, Mr. Haren Dodke (2013 batch) Software trainee, Syntel, Pune. The objective of the seminar was to create awareness among the students regarding opportunities and challenges in deciding their career options. The seminar was successfully handled by Alumni Incharge Prof. A.S. Titarmare.
